DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 29, 2005 has been entered.

The outstanding rejections are withdrawn in view of the amendments filed February 22, 2005. Claims 6 and 8-10 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Koyama et al. (EP 0984 001 A1 from IDS received November 7, 2001), essentially the reason of record.

Koyama et al. teaches a method of combating bacterial infections, both caused by Gram negative or positive bacteria, by employing 20mg/kg of the compounds of formula (V) (See page 11-12, paragraph [058]-[065], also in claim 26-27). Koyama et

al. also teaches the compound of Formula (V) as administered as food product (See page 11, paragraph [059]). Koyama et al. teaches the compounds of formula (V) as useful in treating bacterial topical conditions such as bacterial atopic dermatitis (see page 12, paragraph [064]).

Therefore, the method of treating patients suffered with wound would be inherently present in the teachings of Koyama et al.

Claims 6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1 050 525 ('525), received from IDS filed November 7, 2001.

'525 teaches a method of employing compounds of formula (VII) to induce human insulin-like growth factor (See claim 13).

Response to Arguments

Applicant's arguments with respect to claims 6 and 8-10 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1617

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
